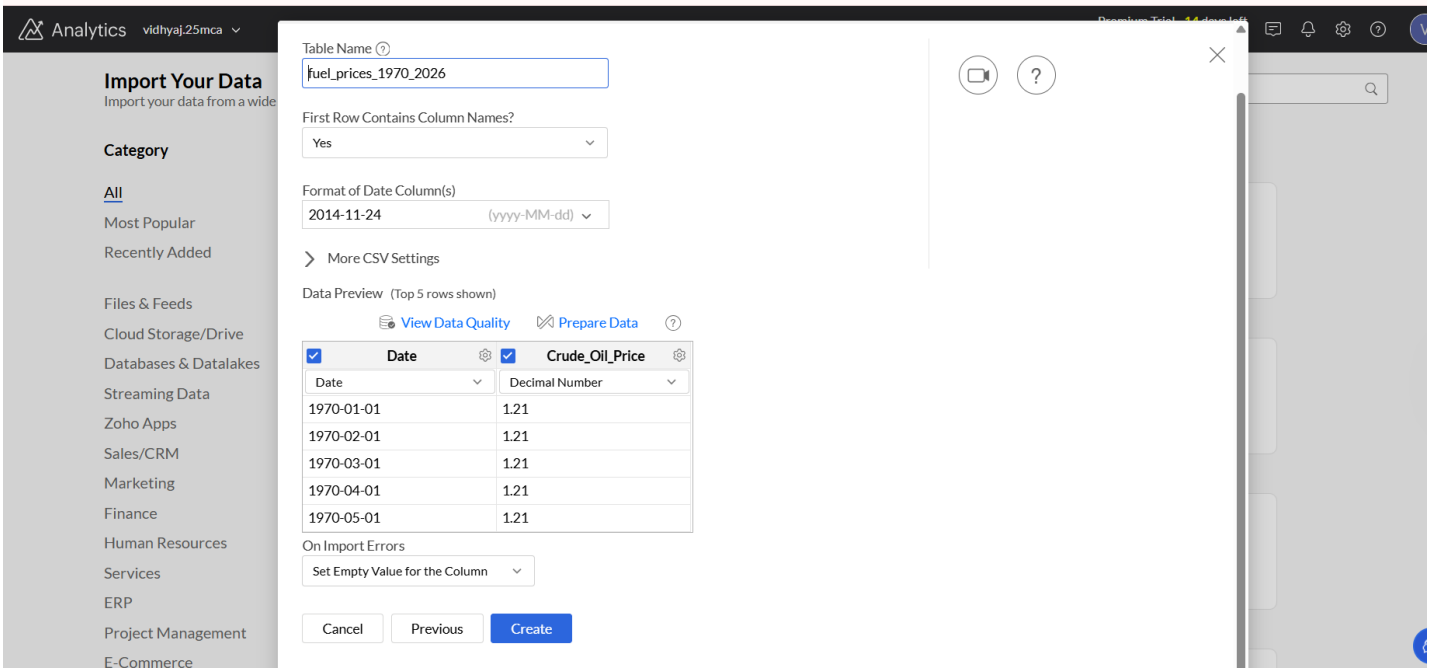
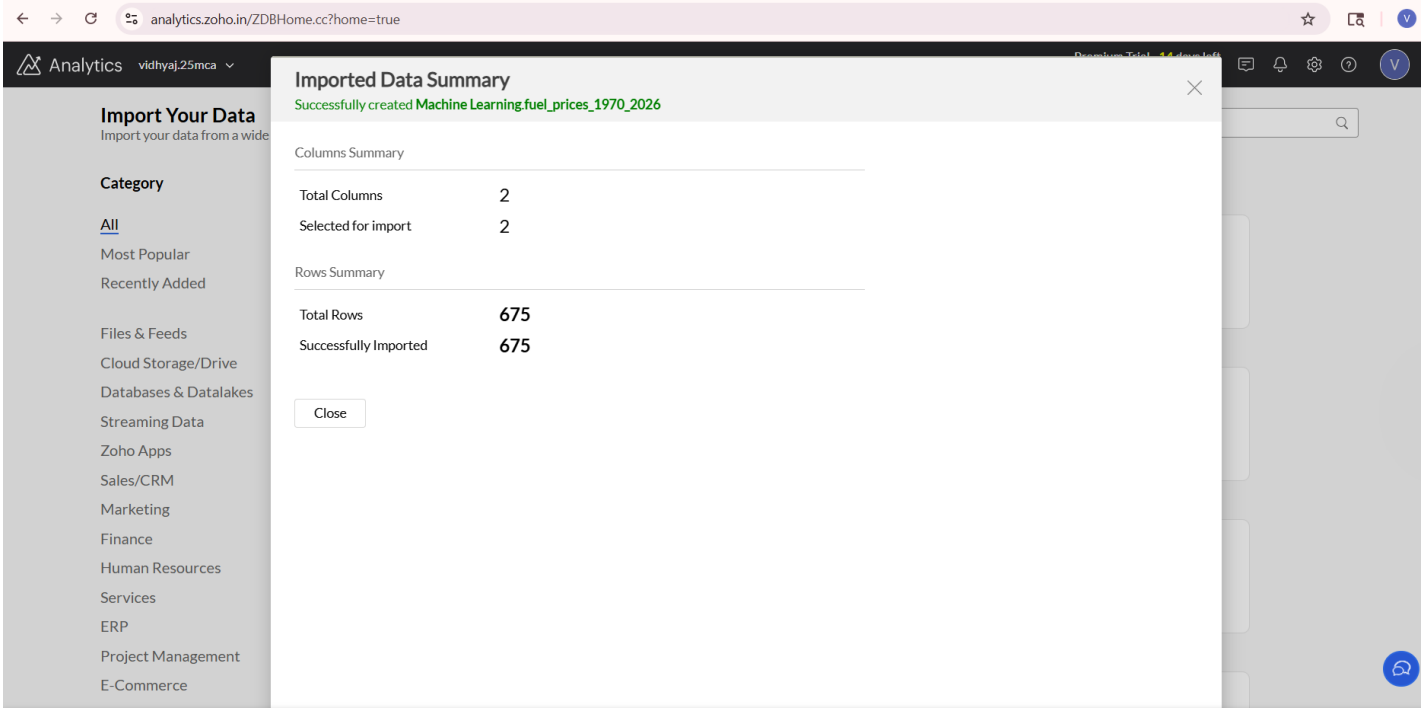
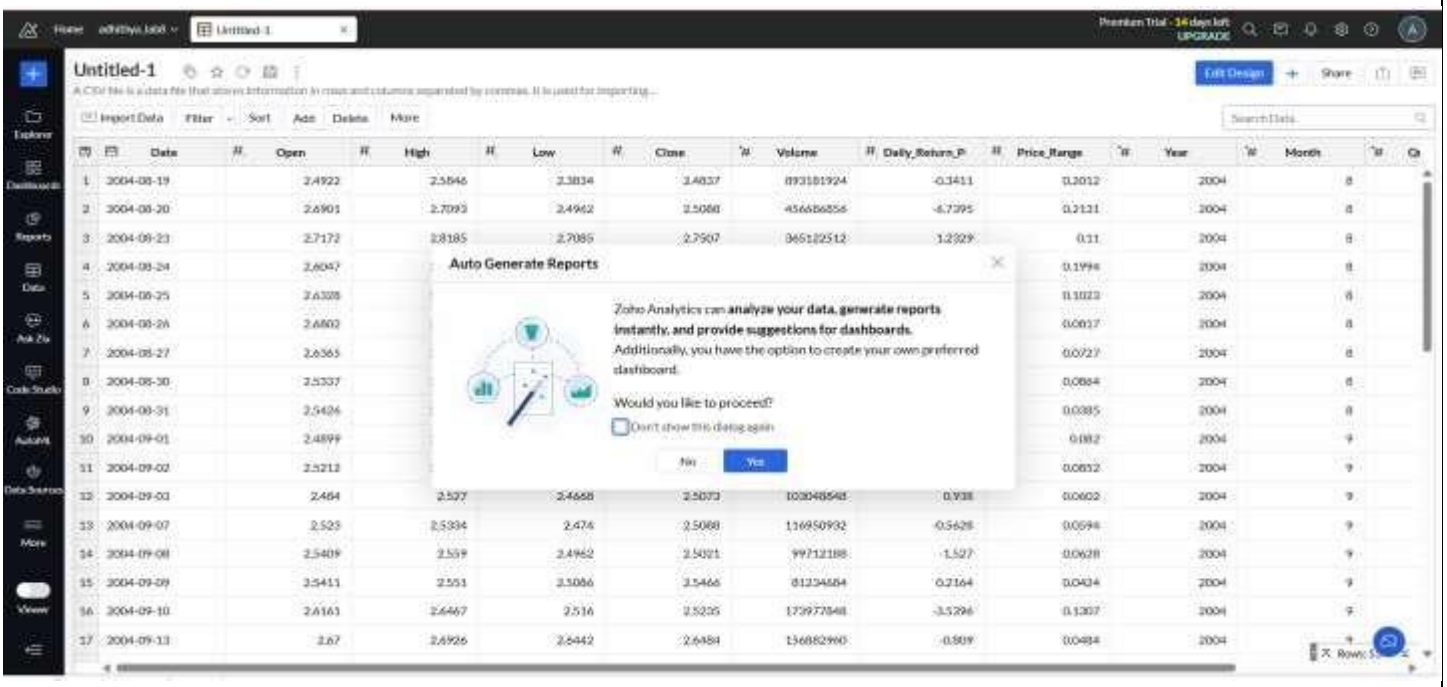
Create Table - Import
Premium Trial - 14 days left
UPGRADE
Step 1 of 2: Create Table (Import)
Create table(s) by importing data from Excel, CSV, HTML, XML, JSON, Statistical, Spatial & MS Access files
Table Name*
Untitled-1
Description
A CSV file is a data file that stores information in rows and columns separated by commas. It is used for importing stock price data into Zoho Analytics
File Type
CSV/TSV & Other Text Format
Data Location
Local Drive
Pasted Data
FTP
File*
Try Sample
Choose File
GOOGL_stock_data.csv
(Supported file formats: CSV, TSV and other text files)
Note:
For other file formats, Choose the corresponding 'File Type' option above.
For large size CSV or TSV or Text file, we recommend to zip it and upload.
Zipped CSV, TSV or Text file should contain only one file in it.
General Info:
Data size should be less than 100 MB and the number of rows should be less than 1 Million
To Upload more, use our Databridge, provided your data is in CSV or TSV text file formats
Contact support@zohoanalytics.com for any assistance
Cancel
Next





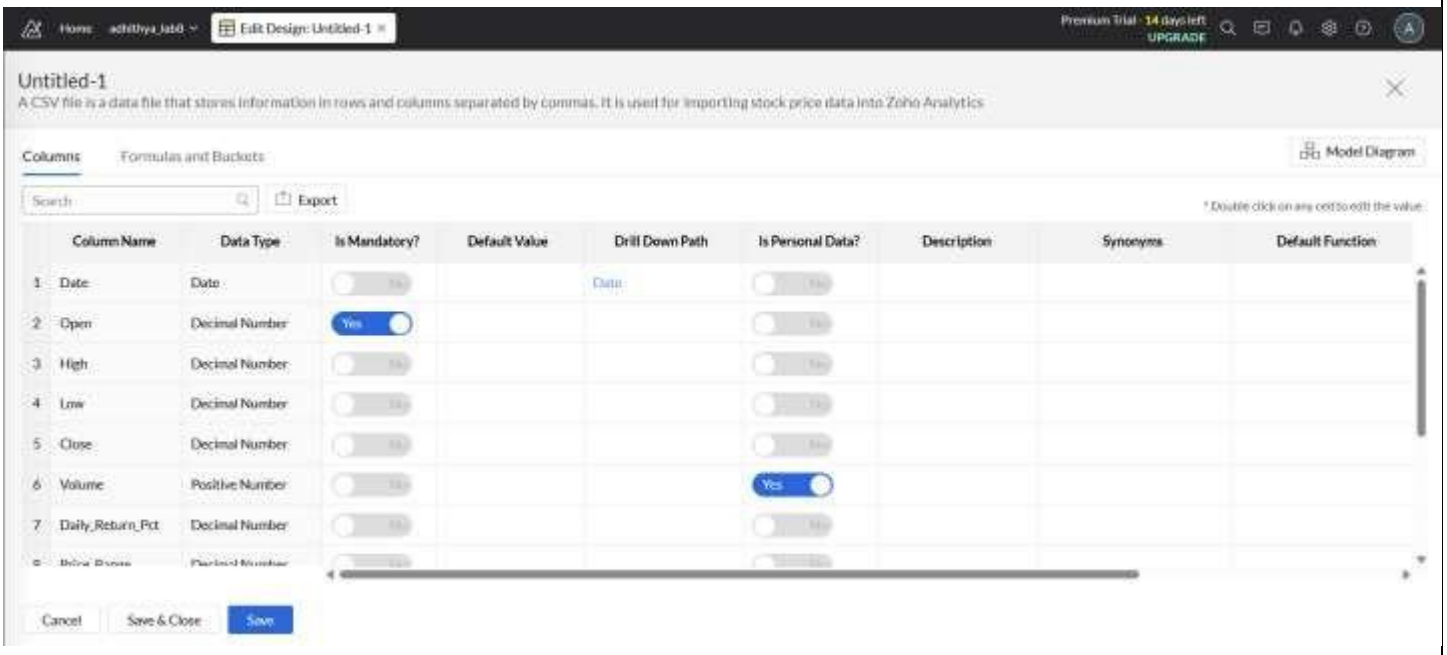
Step 4: Configure Data Import Settings

1. Zoho Analytics will automatically detect columns and data types.
2. Verify that the column names and data types are correct.
3. Click **"Next"** and wait for the file to be uploaded.
4. Once the upload is completed, click **"Close"** to finish importing the data.



Step 6: Create a Data Visualization

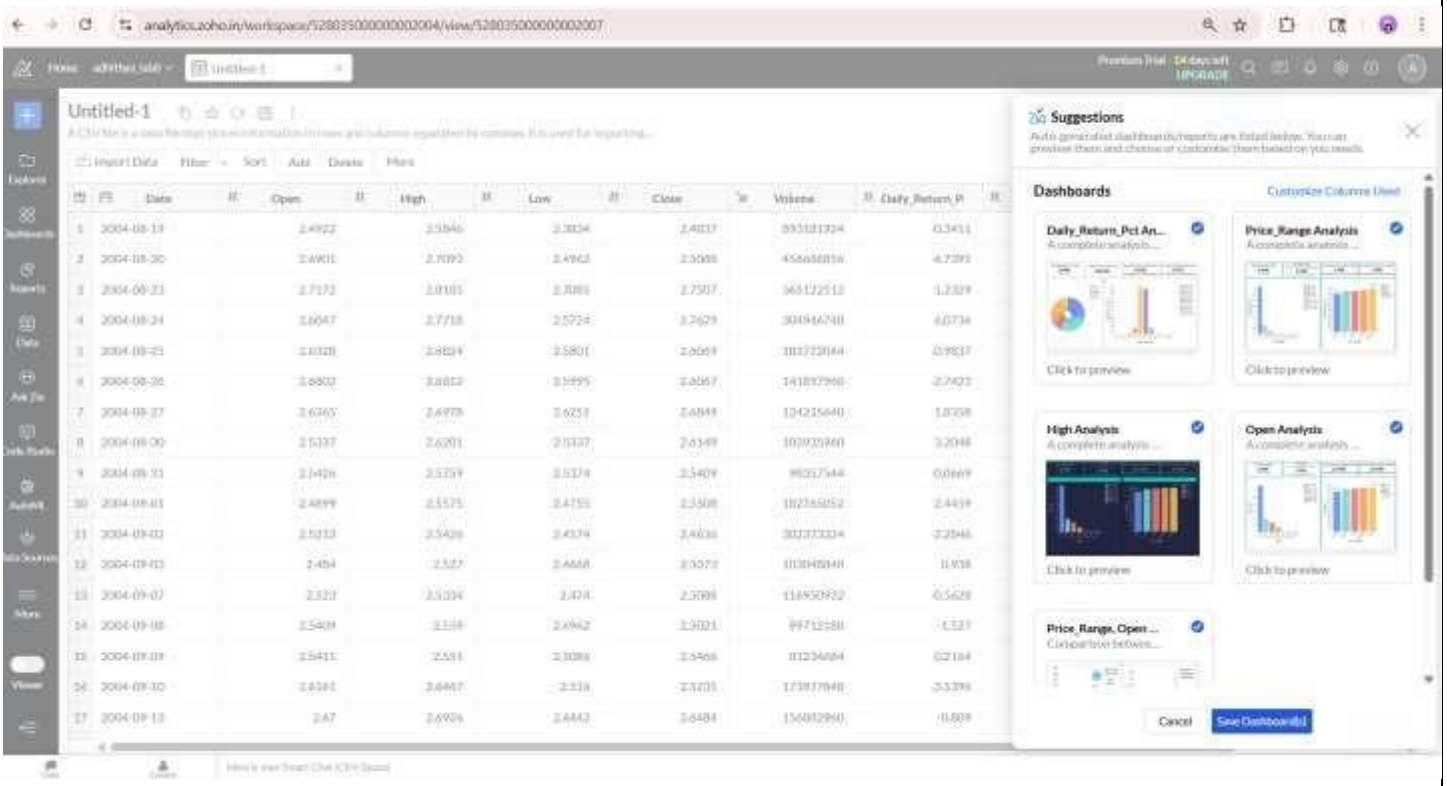
1. Select the **columns** you want to visualize from the imported dataset.
2. Drag and drop columns into the **X-axis and Y-axis** fields.
3. Click **"Create"** to generate the visualization.



Step 7: Customize & Save the Report

1. Customize your chart by changing colors, labels, and filters.
2. Click **"Save"** to store the report in your workspace.

3. You can add multiple charts to create a **dashboard**.



Step 8: View and Share the Dashboard

1. Navigate to **Dashboards** and click **"Create New Dashboard"**.
2. Add multiple reports and charts to the dashboard.
3. Click **"Save & Share"** to share it with others.
